FOLLOWING CROPS after normal harvest or crop failure

In the event of crop failure, only plant winter wheat in the same season as an application of NIANTIC® and if it has been used in tank-mixture or sequence with one of the permitted ALS inhibitors, check the partner label and use the most restrictive recommendation for succeeding crops.

Only winter wheat, winter barley or winter oilseed rape may be sown in the year of harvest to succeed a winter wheat crop treated with NIANTIC®. Spring wheat, spring barley, spring oilseed rape and sugar beet may be drilled in the spring following harvest of the NIANTIC® treated winter wheat crop. Plough prior to planting crops

of oilseed rape, otherwise crop damage may occur. In the event of crop failure for any reason, sow only winter wheat in the same cropping season as an application of NIANTIC®. Where NIANTIC® is applied in sequence or tank mixture with other permitted "ALS inhibiting" herbicides, always follow the most restrictive label with regard to following crops.
