

Product	Label Contents	Dimensions (WxH)
LIFE SCIENTIFIC TRINEX (IE)	1 L - Booklet	240 x 149 mm

### 3 Spray Nozzles

Application should be made using a MEDIUM quality spray in a minimum of 200 L/ha. A spray pressure of 2-3 bar is recommended. Calibrate equipment before an actual application.

#### Knapsack Rate Estimator:

A full 20 litre knapsack sprayer applying spray at 200 L/ha will treat 1,000 m<sup>2</sup>.

Life Scientific Trinex recommendation	Life Scientific Trinex ml per 20 litres spray mixture
0.4 L/ha in 200 L/ha water	40 ml
0.5 L/ha in 200 L/ha water	50 ml
0.6 L/ha in 200 L/ha water	60 ml
0.8 L/ha in 200 L/ha water	80 ml

#### Tank Mixes

LIFE SCIENTIFIC TRINEX is physically compatible with a range of other products but the efficacy of the mixtures have not been confirmed in trials so use is at the grower's risk. If using tank mixes, unless directed otherwise, the preferred order of addition of products to the tank is: water dispersible granules, wettable powders, suspension concentrates (flowables), emulsifiable concentrates, soluble concentrates. Each product must be added to a half-full sprayer and be fully dispersed before the addition of the next product.

Tank mixes must only be applied within the label recommendations of every product in the mix. Contact your supplier for compatibility information on specific tank mixes. Manufacturer's instructions must be followed for each tank-mix component.

#### CLEANING OF APPLICATION EQUIPMENT

To avoid damage to other crops, the application equipment must be thoroughly de-contaminated after application.

- Immediately after application, drain the tank completely and wash down with clean water. Rinse out the tank and flush through the booms and hoses.
- Half-fill the tank with clean water and add the recommended dose of detergent cleaner. Agitate and then flush the boom and hoses with the cleaning solution. Top up the tank so that it is completely full and leave to stand for 15 minutes with the agitation running. Flush the booms and hoses again and drain completely.
- Remove the nozzles and filters and clean separately in a solution of detergent cleaner in 10 litres of water.
- Rinse the tank again with clean water, using at least 10% of the tank volume and dispose of the washings safely. For disposal of washings in Ireland you should comply with local and national regulations.

#### CONDITIONS OF SUPPLY

All goods supplied by the company are of good quality and we believe them to be fit for purpose. However, as we cannot exercise control over their storage, handling, mixing or use or the weather conditions before, during or after application, which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded, and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
