TANK MIX SHEET

ΚΙΡΟΤΑ

The following tank mixes are supported for physical compatibility with KIPOTA at recommended rates of use and will mix in the sprayer tank.

No tests have been undertaken on crop safety or product performance, therefore use is at users own risk.

NOTES:

Always apply KIPOTA with an authorised adjuvant. Optimum results will be obtained from the use of mineral oils or methylated seed oils. Life Scientific recommend methylated seed oils in preference

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical.

Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.
