TANK MIX SHEET

SPRING

NIANTIC®

This SPRING tank-mix sheet provides information in addition to what appears on the product label for Niantic®.

In the spring, for best results, Niantic + PROBE/ Biopower should be applied alone.

If tank-mixing is necessary, then Life Scientific will support the physical compatibility of tank-mixes of Niantic + PROBE/ Biopower with only one of the products listed below.

The following tank-mixes are supported for physical compatibility with Niantic® + PROBE/ Biopower at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance. Use is at user's own risk.

Before using any tank-mixture, consult and comply with the recommendations of the partner products.

Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical.

Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

Notes:

- Ⓞ Always add PROBE/ Biopower to the spray tank last.

**For any tank-mix, observe earliest and latest timings and all directions for use on the labels of both products.**

**PLEASE NOTE:**

The following tank-mixes are supported for physical compatibility with NIAN TIC + PROBE/Biopower at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety. Provided that all product recommendations are adhered to NIAN TIC + PROBE/Biopower may be applied in mixture with one of the following pesticides:
