

The following tank mixes are supported for physical compatibility with ORASO PRO at recommended rates of use and will mix in the sprayer tank.

No tests have been undertaken on crop safety or product performance, therefore use is at users own risk.

Only one herbicide, one fungicide and one PGR are recommended in one mix unless otherwise stated.

Before using any tank mixture, consult and comply with the recommendations of the partner products.

Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical.

Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

PLEASE NOTE:

The following tank mixes are supported for physical compatibility with ORASO PRO at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety. Provided that all product recommendations are adhered to ORASO PRO may be applied in mixture with the following pesticides:

Do not mix with Platform S.

****DO NOT use Kipota/Topik in mixes with Oraso Pro + strobilurin + Moddus***** Approved Chlorothalonil SC formulations only****In soft crops avoid the use of tank-mixtures with Niantic + Probe/Biopower or Cintac + Probe/Biopower**

All sulphonyl urea herbicides have the potential to cause damage to sensitive crops if residues are left in the spray tank. For this reason, sprayer hygiene following the use of SU + Chlorothalonil + Oraso Pro is very important. Sprayers should always be thoroughly cleaned out with a proprietary sprayer cleaner immediately after use. This should always take place, even if further cereal crops have been treated by the sprayer between the last application SU mixtures and a subsequent broad-leaved crop.

Authorisation for disposal, storage and use of existing stock ends on:
