

The following tank mixes are supported for physical compatibility with SUDO MOR at recommended rates of use and will mix in the sprayer tank.

No tests have been undertaken on crop safety or product performance, therefore use is at users own risk.

Life Scientific will support the physical compatibility of 2 or 3 way tank mixes of SUDO MOR with any of the fungicides, herbicides or adjuvants listed below.

Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

Before using any tank mixture, consult and comply with the recommendations of the partner products.

Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical.

PLEASE NOTE:

The following tank mixes are supported for physical compatibility with SUDO MOR at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety. Provided that all product recommendations are adhered to SUDO MOR may be applied in mixture with the following pesticides:

Thor³

Kipota + Oil/Topik + Oil

Chlormequat^{1,4}

Stabilan 750

Lambdastar/Hallmark Zeon

1, Not to be used on spring barley.

2, Only apply with SUDO MOR @ 0.2 l/ha if absolutely necessary as crop phytotoxicity can occur. Leave 5-7 days between applications of Niantic + Probe/Atlantis + Biopower and SUDO MOR.

3, Caution when mixing with SUDO MOR as can cause crop phytotoxicity in winter & spring barley and oats.

4, Life Scientific Ltd will only support the use of SUDO MOR, not SUDO MOR + chlormequat on spring oats.

Tank mix sheet produced 25th August 2021.
